

EFFLORESCENCE REMOVER

PRODUCT DESCRIPTION

- Efflorescence Remover is a professional strength product for removing salt deposits from brickwork, mortar, natural stone, patios and driveways without altering the appearance of the surface.
- Efflorescence Remover is unlike other products, it not only removes the surface salt, it penetrates deep into the surface to help prevent re-occurrence. The active components complex with any salts in the substrate rendering them soluble in water, thus removing the reappearance of white deposits.
- If the deposits on the surface are hard and don't dissolve with water or will not easily brush off, you will need to use ProtectiT Concrete Remover not Efflorescence Remover.

IMPORTANT BEFORE USE

Do not apply during rain or frost and when surface and air temperature is < 5°C and > 30°C. Wear protective gloves and glasses, and appropriate clothing whilst using the product. Do not dilute or mix with any other product, notably bleach (risks of evolution of toxic chloride gas). Once efflorescence has been removed we recommend the area is treated with either Paving & Patio Sealer or Stone & Render Sealer to maintain a pristine surface appearance. For Health & Safety instructions, first aid measures, spillages and disposal instructions, see separate Health & Safety Data Sheet (MSDS).

APPLICATION

Always carry out a test area first to ensure the finished result is acceptable.

- Shake the container well before use. Apply a saturated coat at a rate of 5 m² per litre by brush or garden sprayer.
- Leave for 1 hour and re-apply.
- Leave for up to 24 hours for effective removal of salts.
- Wash surface salts away with a dilution of 1:50 Efflorescence Remover to water with a stiff brush or power jet and leave to dry.
- Treat with one of our invisible sealers once dry.
- Clean all tools with water after use.

COVERAGE

1 Litre covers 4 - 5m² (depending on porosity and texture of the surface)

KEY FEATURES

- Professional strength that removes white efflorescence from brick, mortar, natural stone, patios & driveways
- Non-corrosive, biodegradable
- Does not alter the appearance of the surface

TECHNICAL DATA

- **Physical State at 20 °C:** Liquid
- **Appearance:** Pale yellow
- **Odour:** Perceptible
- **pH:** 3.5 ± 0.5
- **Density:** 1.06
- **Solubility in Water:** Fully soluble
- **Flash Point [°C]:** >93°C

SHELF LIFE & STORAGE

24 months from the date of manufacture in the original unopened container. Store locked up in dry place between 5°C and 25°C in the original container.
